

3MSM Health Care Academy

Focusing on Catheter Securement: Science and best practices – SOP 38.

Recognised as the premier organisation for the specialty practice of infusion nursing, the Infusion Nursing Society (INS) released the 2021 Infusion Therapy Standards of Practice in January 2021. Join us for the fourth webinar in our five-part series aimed at translating these standards into practice.

In this webinar, Tricia Kleidon will update on various securement strategies to be considered in your daily practice to optimise device security and ease of assessment. The webinar will be moderated by Dr Nicole Marsh, a Research Fellow Vascular Access with a joint appointment between the Royal Brisbane and Women's Hospital and Griffith University.

Objectives:

1. Define stabilisation and securement of vascular access devices (VAD).
2. Identify the common causes of securement failure.
3. Discuss the current methods being used, their advantages and disadvantages.
4. Review the best practice recommendation for VAD and dressing securement from INS.

Date	Time
Wednesday 27 th October 2021	5PM – 6.30PM NZDT
